EHR AFRICA -- DRY RUN WORKFLOW GUIDE

Standard Patient Flow

New or returning patient | Pay at CASHIER AFTER consultation

Flow Type	Avg Duration	Starts At	Ends At	QMS	Payment
Standard	**45-90 min**	**Hospital Gate**	**Pharmacy / Exit**	**Required**	**AFTER consultation at Cashier**

PATIENT JOURNEY:

Gate > Registration > Triage > Doctor Queue > Consultation > CASHIER > Pharmacy > Lab / Imaging > Exit

STEP-BY-STEP PROCEDURE

1 Patient Arrives at Hospital Gate

[Gate Staff]

System: QMS > Gate Ticket Issue

- Gate staff issues QMS ticket to patient.
- Select patient type: New or Returning.
- Select destination: OPD / Consultation.
- Print ticket and direct patient to Registration counter.

2 Registration / Patient Check-In

[Receptionist]

System: Patients > Register OR Patients > Search

- NEW patient: complete full registration (name, DOB, phone, address, next-of-kin, ID).
- RETURNING patient: search by name or Patient ID, open record, confirm details.
- Assign or confirm Visit for today.

3 Triage - Vitals & Chief Complaint

[OPD / Triage Nurse]

System: Consultations > Triage Workstation

- Open patient in Triage Workstation.
- Record Visual Acuity (VA): right eye and left eye - unaided and aided.
- Record Intraocular Pressure (IOP), blood pressure, weight if relevant.
- Record Chief Complaint (reason for visit).
- Note any known allergies or urgent symptoms.
- Click Submit Triage - patient enters doctor queue automatically.

4 Doctor Queue - Patient Waiting

[QMS Display / Nurse Dispatcher]

System: QMS > Doctor Queue

- Patient waits to be called - queue board shows ticket number and room.
- Nurse/dispatcher calls next patient from the doctor queue screen.

5 Doctor Consultation

[Ophthalmologist / Doctor]

System: Consultations > Workstation

- Open patient from the queue - vitals pre-populated from triage.
- Select Consultation Type (Gen Ophthalmology, Retina, Glaucoma, Cataract, etc.).
- Complete clinical examination form.
- Add Diagnosis (ICD-10 codes).
- Issue orders: Drug Prescription > Pharmacy | Lab Order > Laboratory | Investigation > Imaging.
- Click Complete Consultation.
- Optionally book Follow-up Appointment.

6 CASHIER - PATIENT PAYS (MANDATORY STOP)

[Cashier]

System: Billing > Cashier POS OR Billing > Work Queue

- **EVERY PATIENT MUST PAY AT THE CASHIER BEFORE RECEIVING MEDICATION.**
- Cashier searches patient by name or Patient ID.
- Pending charges appear automatically: consultation fee + any ordered services.
- Select payment method: Cash / Mobile Money / Card.
- Process payment - system generates Receipt automatically.
- **PHARMACY WILL NOT RELEASE MEDICATION UNTIL PAYMENT IS CONFIRMED IN SYSTEM.**
- Print or show digital receipt to patient.

7 Pharmacy - Medication Dispensing

[Pharmacist]

System: Pharmacy > Dispensing Queue

- Prescription appears in dispensing queue ONLY after payment is confirmed.
- Pharmacist reviews drug list and checks for interactions.
- Dispense medications and mark as dispensed.
- Counsel patient on dosage and instructions.

8 Laboratory / Investigations (if ordered)

[Lab Tech / Investigation Tech]

System: Investigations > Workstation OR Laboratory > Dashboard

- Patient goes to lab/imaging unit with order slip.
- Tech locates order in workstation queue and performs test.
- Enter results into system - report auto-linked to patient record.
- Doctor is notified of completed results.

9 Patient Exit / Discharge

[Receptionist / Gate Staff]

System: Visit marked Completed automatically on payment

- Patient collects medication from pharmacy.
- If follow-up was booked, patient receives appointment card or SMS.
- Patient exits - QMS token closed.

NOTE: KEY RULE: Payment at the Cashier (Step 6) is MANDATORY for ALL standard patients. The pharmacy will NOT release medication until the invoice is marked PAID. No exceptions.

CHECKLIST: DRY RUN CHECKLIST: QMS display working > Registration creates patient > Triage workstation accessible > Doctor queue loads > Cashier POS processes test payment > Pharmacy queue shows prescription ONLY after payment confirmed.
