EHR AFRICA -- DRY RUN WORKFLOW GUIDE

# Express / Fast Track Patient Flow

Patient pays cashier FIRST | Gets priority queue ticket | Seen before standard patients

| Flow Type | Avg Duration | Starts At | Ends At | QMS | Payment |
|---|---|---|---|---|---|
| **Express / Fast Track** | **15-35 min** | **Express Cashier Desk** | **Pharmacy / Exit** | **Express Priority Queue** | **BEFORE consultation - pays cashier first** |

**PATIENT JOURNEY:**

Arrival > **CASHIER (PAY FIRST)** > Express Ticket > Brief Triage > Priority Consult > Pharmacy > Exit

## STEP-BY-STEP PROCEDURE

### 1 Patient Arrives & Requests Express Service

**[Gate Staff / Receptionist]**

System: QMS > Gate Issue

- Patient arrives and requests Express / Fast Track service.
- Gate staff directs them to the EXPRESS CASHIER DESK - skips standard registration queue.
- Returning patients already registered; new patients registered at the express desk.

### 2 EXPRESS CASHIER DESK - PATIENT PAYS FIRST (START HERE)

**[Cashier (Express Desk)]**

System: Billing > Cashier POS (Express terminal) + QMS > Express Desk

- THIS IS THE FIRST STOP - patient pays consultation fee BEFORE seeing the doctor.
- Search for existing patient or do quick registration if new.
- Create invoice for Consultation Fee (Express rate if applicable).
- **COLLECT PAYMENT NOW: Cash / Mobile Money / Card.**
- Issue payment receipt to patient.
- Open QMS > Express Desk and issue Express Priority Ticket.
- Ticket shows EXPRESS prefix - appears at TOP of queue board.

### 3 Brief Triage

**[OPD Nurse]**

System: Consultations > Triage Workstation

- Express patients still need basic vitals - nurse sees them immediately ahead of standard queue.
- Record VA (right eye, left eye), IOP, chief complaint.
- Takes 3-5 minutes maximum.
- Patient enters Express Doctor Queue after triage.

### 4 Priority Doctor Consultation

**[Doctor]**

System: Consultations > Workstation

- Express tickets appear at TOP of doctor queue (marked EXPRESS).
- Doctor calls express patient BEFORE standard patients.
- Perform consultation in normal way.
- Issue prescriptions / additional orders as needed.

### 5 Additional Billing for Extra Services (if needed)

**[Cashier]**

System: Billing > Work Queue

- Consultation fee was pre-paid at Step 2.
- If doctor added new orders (lab tests, investigations, medications), those create a NEW bill.
- Patient returns to cashier to pay for additional services before receiving them.

## 6 Priority Pharmacy Dispensing

**[Pharmacist]**

System: Pharmacy > Dispensing Queue

- Express prescriptions flagged for priority service.
- Dispense medications - target: patient waits no more than 5 minutes.
- Mark prescription as dispensed.

## 7 Patient Exit

- Patient exits with medication and receipt.
- Target: entire visit completed within 35 minutes from arrival.

NOTE: WHAT IS EXPRESS? A patient who does not want to wait in the standard queue pays the consultation fee UPFRONT at the Express Cashier Desk, then receives a priority ticket and is seen before standard-queue patients.

CHECKLIST: STAFF NOTE: Express lane is a paid priority upgrade. Do NOT allow patients to join without completing payment at Step 2. Express patients needing extra services must pay for those separately.
